Temperatures will peak this morning and gradually decrease through the day. Light precipitation is expected to overspread the region around daybreak and persist through the afternoon. As colder air aloft moves into the forecast area an initial rain/winter mix will transition to all snow by the late afternoon. Accumulations will remain light with the southern Rolling Plains perhaps seeing a light glazing of ice with a few tenths of an inch of snowfall while the rest of the region is expected to only see a few tenths of an inch of snowfall.
